

oomph::SamplePointContainerParameters

```
classDiagram
    class oomph_SamplePointContainerParameters
    class oomph_BinArrayParameters
    class oomph_NonRefineableBinArrayParameters
    class oomph_RefineableBinArrayParameters

    oomph_NonRefineableBinArrayParameters --|> oomph_BinArrayParameters
    oomph_RefineableBinArrayParameters --|> oomph_BinArrayParameters
    oomph_BinArrayParameters --|> oomph_SamplePointContainerParameters
```

The diagram illustrates the inheritance hierarchy for oomph parameters. At the top is the base class, oomph::SamplePointContainerParameters, enclosed in a dashed box. Below it is the oomph::BinArrayParameters class, shown in a solid box. At the bottom are two subclasses: oomph::NonRefineableBinArrayParameters and oomph::RefineableBinArrayParameters, both in solid boxes. Arrows indicate the inheritance relationships: from the two bottom classes to the middle class, and from the middle class to the top class.

oomph::BinArrayParameters
