Chapter 1

IGNORE THIS! Deliberately broken doc page for self-test

Here's a code inclusion that works:
```
//===== start_of_namespace============================================
```

...and here's one that doesn't because I've deliberately broken the hook:

Here's a link that works

```
Sommerfeld radiation condition
```

and here's one that possibly doesn't because of an isolated "<a":

```
Sommerfeld radiation condition
```

Bla bla ```click on this and you won't get anywhere because the link is broken!``` bla bla.
